

Safety, Health & Environment - Observations

LifeGuard is AECOM's global tool to support Safety for Life.

Employees can use LifeGuard to report Safety, Health & Environment (SH&E) related observations in our offices and project sites. Observations can be viewed on maps globally, regionally, and at the project level.

The tool enables us to recognize safe and healthy actions and conditions and helps us take corrective and preventative measures.

To record your own observations, click [LifeGuard](#).
